DETAILED ACTION***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 3, 5-9, 11, 12 and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Kaharu et al. US 5,130,836 (Kaharu).

Re claims 1, 3, 6, 7, 9 and 12 Kaharu disclosed

An optical transmission system (apparatus /monitoring method, external conducting means), comprising an optical communication apparatus, a communicating party of said optical communication apparatus, and a monitor (PTi of Figure 3) for performing monitoring of

Art Unit: 2633

optical signals transmitted (A of Figure 3) and received (B of Figure 3) between said optical communication apparatus (left of Figure 3) and said communicating party (right of Figure 3); wherein said optical communication apparatus comprises: optical branching means (C1 and C2 of Figure 3) for branching optical signals to be transmitted to said communicating party (left of Figure 3) and optical signals received from said communicating party (left of Figure 3); and conducting means for conducting said optical signals to be transmitted and said received optical signals that have been branched by said optical branching means, to said monitor, and said monitor performs monitoring of the data contents of said optical signals to be transmitted and said received optical signals that have been conducted from said conducting means (e.g., col./line: 3/50-67).

Re claims 5, 8, 11 and 14 Kaharu disclosed

wherein said data contents are signaling information necessary for data exchange (e.g., col./line: 5/10-35).

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 2, 4, 10 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kaharu et al. US 5,130,836 (Kaharu).

Re claims 2, 4, 10 and 13 Kaharu does not disclose

wherein said monitor consists of two mutually independent monitors: a monitor for performing monitoring of the data contents of said optical signals with separate interfaces.

However, it would have been obvious to one of ordinary skill in the art at the time of invention to use separate monitors if for example monitoring occurred in separate locations or by different operators. Furthermore, making parts separable is not patentable over the prior art.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Fujisawa US6317055B1, Tanson US 4,736,464, Lebby et al. US005218465A, Skrobko US005442472A, and Uehara US006335810B1 all disclosed monitoring devices of optical communications systems.
